

CTM-200 Double Station Cup Tea Packaging Machine

The Manual Operate Coffee Tea Cup Packing Machine can fix the tea or tea bag or coffee into the bottom of paper cup by round filter paper/aluminum foil. Customer will get a cup of tea and coffee after pour hot water into that paper cup.

Use automation cylinder down-pressure sealing principles, single position operation at the same or operate only one position. Adjust heat pressing time between 0.1-10s freely and strong utility, the machine use advanced electronic automatic thermostat technology, stable property, high thermal efficiency, long life, low power consumption, less noise. Used 220V power whole machine adopts all stainless steel. Bright and clean, original paper cup separation technique for prevent adhesion of finished good tea cup and heat pressing head, operation more convenient and practical.

Technical Parameters

Cup size	5-12 OZ Cup
Packaging material	Round 8cm or 9cm PLA Fiber (Biodegradable)
Production speed	30-50pcs/min (Double station)
Power	0.9kw*2, 220v, 50hz
Air pressure	≥0.6mpa
Machine Weight	100kg
Machine size(L*W*H)	1000*500*1600mm
