

SPJ100 Fully Automatic Cartoning Machine

SPJ100 Fully Automatic Cartoning Machine applies to the encase packing of blisters, vials, cosmetics and similar stuff. This machine can fold leaflet, open carton and insert stuff with leaflet into cartons, printing batch number and close carton automatically. This machine adopts horizontal configuration, PLC control system, photocell detector installed in each station enables stable running.

Technical Parameters:

Model	SPJ100
Max. Production Capacity	100 boxes/min
Paper Sheet Dimension	> 40*35*3.5 mm < 150*87*50 mm
Cardboard Sheet Dimension	≥ 70*25*14 mm ≤ 158*87*50 mm
Cardboard Thickness	250-350 g/m ² (according to cardboard size)
Air Compressor Pressure	0.5 Mpa > 0.6m ³ /min
Air Consumption	≥ 0.9 m ³ /h
Relative Humidity	Less than 70%
Working Noise	< 85 dB
Power	380V,50 Hz, 0.75Kw
Packing Size	2800*1350*2000 mm
Packing Weight	1200 Kg
