Online printing and labeling machine BCDT40-07

The device is suitable for instant printing and labeling of various label contents. It can realize printing barcode, two-dimensional code, production batch number, etc.

Features:

- Imported printing engine, easy operation and clear printing.
- The unique labeling system ensures the stability and accuracy when printing and labeling.
- The printed content is directly transmitted through the network, and the content setting is real-time and variable.
- Equipped with a variety of auxiliary labeling mechanism, such as blister labeling mechanism, corner labeling mechanism, round bottle roll labeling mechanism, side labeling mechanism, flat labeling mechanism, etc., which is suitable for printing and labeling of various types of products.
- Touch human-machine interface, easy to learn. With multi-group memory function, easy to change specifications and save time and effort.

Technical Parameters:

Model	BCDT40-07
Labeling speed	0~40Pieces/min (depending on the printing content and labeling method)
Label range	W:0～170mm
Maximum label supply	Diameter 350mm The inner diameter of the paper roll is 76mm
Air pressure	0.5～0.8MPa
Voltage	110/220V 50/60HZ
Power	1.5KW
Weight	400KG
Machine size	L:1800mm W:700mm H:1600mm
