

CE-1 HC-CEV Automatic Carton Erector

According to the market demand, the new version installs a protective door in the area where the tape is replaced, Open the door to change the tape, is more convenient, worry; This machine adopts a strict production process, the vertical carton erector speed can reach 12 boxes/minute, absorbs the cartons and forms, and is equipped with an automatic alarm function for broken tape and no tape. This automatic carton has been widely used in food, medicine, beverage, tobacco, daily chemicals, electronics, etc., and other industries.

Features:

- Quickly change the tape, install the tape protective door device, and open the door can change the tape, convenient and fast; Durable accessories use durable parts electrical components and pneumatic components;
- It can be used together with single machine operation and automatic packaging line. Labor-saving goods packing is done by machines instead of humans;
- It is safer to install the broken tape alarm and automatically stop the door opening to avoid operation accidents.

Technical Parameter

Model	CE-1
Unpacking Speed	≤ 12 Carton /min
Carton Dimension	L 250-460×W 150-400×H 100-400mm (Min cannot exist at the same time)
Tape Size	48/60/75mm
Table Height	620±30mm
Gas Consumption	450NL/min
Power supply/Air pressure	220V 50/60HZ/6kg/cm
Machine Weight/Size	2100×2100×1450mm
