

AHB-P205CPVC Center-Seal Machine

Description

- The ideal machine for producing various materials of color shrink label.
- Providing variable speed adjustment to suit various types of materials, adhesive flow rate, and desired working speed.
- Design for a longer service life and easy maintenance.
- Provide the most accurate and fastest heating performance.
- Rewinding buffer roller unit to assure that the most stable winding tension is stable and speed variation even speed varied.

Specification

Material Width (mm)	50-250
Mechanical Speed (m/min)	0-35 (30-350 pcs)
Max. Material Diameter (mm)	700
Tube Width	30-200
Paper Core Inner Diameter (mm)	76/3* or on request
