

MIC-160 Automatic Cartoning Machine

MIC-160 Automatic Cartoning Machine from MIC Machinery offers a cutting-edge solution for businesses looking to optimize their cartoning operations. With a capacity of 80 cartons per minute, this automatic cartoning machine is designed to streamline the packaging process, ensuring high-speed, reliable, and accurate carton formation, filling, and sealing.

Key Features of the MIC-160 Automatic Cartoning Machine

The MIC-160 Automatic Cartoning Machine is equipped with advanced features designed to maximize efficiency and minimize downtime. Here are some of the standout features of this horizontal cartoning machine:

- 1. High-Speed Operation:** With an impressive filling capacity of 80 cartons per minute, the MIC-160 automatic cartoning machine ensures fast and efficient packaging. This high-speed performance makes it perfect for high-volume production environments, allowing manufacturers to meet demanding production schedules without compromising on quality.
- 2. Automatic Cartoning Process:** This automatic cartoning machine automates the entire process, from carton forming to filling and sealing. The result is a seamless, labor-saving operation that reduces human error and enhances consistency in packaging.
- 3. Horizontal Cartoning Design:** The horizontal cartoning machine design is specifically built to handle cartons that lie flat during the packing process. This design ensures easy product loading and improved flexibility when handling different carton sizes, making it ideal for various product types.

4. Precision Carton Forming and Sealing: The MIC-160 cartoning machine ensures that each carton is perfectly formed and securely sealed. This precise control helps avoid carton misalignment, weak seals, or misfiled products, ensuring high-quality packaging.

5. Versatile Application: The MIC-160 automatic cartoning machine is designed to accommodate a wide range of products. From pharmaceuticals to food and beverages, the machine can efficiently package a variety of goods, including bottles, pouches, and other packaged items.

6. User-Friendly Interface: With an intuitive control panel, operators can easily monitor and adjust the settings of the horizontal cartoning machine. The system is designed for quick setup, minimal downtime, and ease of operation.

6. Compact and Efficient: Despite its high-speed capability, the MIC-160 automatic cartoning machine is compact and space-efficient, making it suitable for businesses with limited floor space while maintaining high productivity.

Parameter

Packing speed		≤80Cartons/min
The carton	The quality requiremants	350-450g/m ³
	Size range	(70-280)x(60-200)x(20-110)mm
The instructions	The quality requirements	60-70g/m ³
	Unfolded size Range (1-4 folds)	(130-190)x(90-130)mm
The compressed air	Main motor power	≥0.16m ³ /min 0.6mpa
Main motor power		1.5Kw 220V/380V 50HZ
Overall dimensions		4100x1400x1800mm
The whole machine net weight		1300kg
Hot melt adhesive machine	Selected by customers (our compeny usually USES domestic Jingtai or imported Lebest)
