

YLD-25 Semi Automatic Tube Filling and Sealing Machine

The YLD-25 is a high-efficiency automatic tube filling and sealing machine designed for semi-viscous products such as toothpaste, ointments, creams, and food pastes. It integrates tube feeding, orientation, filling, sealing (heat or ultrasonic), trimming, and coding in one unit. Ideal for cosmetic, pharmaceutical, personal care, and food industries, ensuring clean, tight, and professional tube sealing.

Technical Parameters

Filling Volume:	10-50ml, 10-100ml, 30-300ml (or customized according to samples)
Production Capacity:	10-25 pieces/minute
Accuracy:	±1%
Suitable Bottle Shape:	Cylindrical $\Phi 15\text{-}\Phi 50\text{mm}$; Height: 60-200mm
Air Pressure:	0.55-0.65mpa
Coding Machine:	2*3mm, can continuously print 8 digits
Dimensions:	1100*850*2000mm
Weight:	300 Kilograms
Print Size:	2*3MM one line can print 8 digits
