

SED-250RJ Pill Encapsulating Machine With Stainless Steel Long Life Time

The encapsulation machine is the main device, together with the corresponding auxiliary equipment, component production line. Specific product to prevail in kind, the manufacturers reserve the right to upgrade product design.

Feature:

1. Capsule package rate is up to 98%.
2. The gelatin ribbon is lubricated by fine oil supply technology in order to lower the consumption of lubrication oil. The ribbon is lubricated by vegetable oil, so the capsules produced is free of wash.
3. High quality capsule deferent equipment adopts food conveyer belt authorized by American FDA, without poison and adhibition and easy to clean.
4. Optimized designed mould is made of high quality aviation alloy material by high precision numerical control process to insure the mould's service life.
5. Advanced process and assembly technics make the complete appliance quality stabilization , high working rate, and good shape pill.

Technical Data

roll mode speed:	0-5rpm
roll mode size:	φ150×250mm
capsule production:	100000/h,8#olive,500mg/pill
material feeding quantity:	0-2(ml)
load difference:	less than ±2%
load precision:	≤±1%
power supply:	380V 50HZ
motor power:	1.1Kw
total power:	17Kw
dimentions:	2110X1000X2000mm
weight:	1800KG
