

Automatic Coating System KSC Series

◆ **Feature:**

- High precision coating system.
- For tablet sugar & organic, aqueous coating system.
- PLC control system.
- According to GMP regulations.

◆ **Binder tank:**

Heater (Choice of steam and electric) and agitator (Choice of prevention of sedimentation and for dissolving) are installed for maintaining temperature and prevention of sedimentation and for dissolution in order to maintain best condition at the time of spraying.

◆ **Control part:**

It is divided into air control panel and electric panel. So it can be used safely in the area belongs to explosion range and is made to assure checking process at a glance.

In particular P.L.C. is used to expedite convenient application under different circumstances.

Specification:

Model	Brim volume (Liter)	Output capacity (kg/Batch)
KSC-40	2.5 ~ 6.0	1.0 ~4.8
KSC-100	105	50 ~70
KSC-130	225	120 ~150
KSC-150	350	200 ~ 230
KSC-170	550	320 ~ 380
