

## *Pelletizer Machine BG*

A pellet machine is used to compress a variety of resources into a tiny pellet. Yenchen provides qualified machinery here, offering a practical way to produce them. The equipment is designed for various types of pharmaceutical and food production.

Yenchen pellet machine has a rotatable matrix disc, vertically adjustable pressing rollers that can control the position of the upper and lower plungers, a drive for a height adjustment of the rollers, a housing accommodating the drive, and a bearing block supporting the pressing roller.

### **Specification:**

<b>Model</b>	<b>Capacity Kg/Batch</b>	<b>Room Dimension WxDxH (mm)</b>
YC-BG-1	1~2	1250x700x1600
YC-BG-2	15~25	1450x940x1450
