

ZTF- 320 Automatic Multi-line Powder Packaging Machine

1. All the cover of the packaging machine is 304 Stainless Steel, it is full closed when the machine is running which makes the materials packed by the machine conforms to the GMP Standard.
2. High-precision carrying film system, PLC programmed Control, Advanced touch-screen man-machine interface, Automatic Photocell Positioning tracking system, PID and Digital Temperature control are adopted by this packaging machine.
3. Special sealing, cutting technology are adopted by this packaging machine, avoid the flanging phenomenon of the sealing side and makes the bag neat and flat.
4. Touch-screen servo-motor and screw system are adopted as the feeding part structure which makes the measure more accurate and makes the operation simpler.

Technical Parameters:

| Type | ZTF-320 |
|-------------------------|-------------------|
| Max width of film | 320mm |
| Capacity of per-line | 40bags/min |
| Compressed air pressure | 0.6 Mpa |
| Air consumption | 2square/hour |
| Power | 220V 50HZ 3.2KW |
| Weight | 600kg |
| Dimension L*W*H | 1100*1200*2200 mm |
