

Bulk Conveyors

Our **belt and chain conveyors** can be used to collect, transport or stockpile a wide variety of bulk materials. Whether you are looking for a troughed belt, a slider bed, a cleated belt, a drag chain or a steel apron conveyor, we offer a complete range of bulk conveyor lines for standard to heavy-duty applications.

Features and benefits

- Shaft-mounted gear motor for less maintenance
- Modular 10' (3 m) sections for easy assembly and future modifications
- Easy belt tensioning at the tail
- Return roller(s) supporting the belt
- Belt support and skirting for improved sealing and spillage control
- Tensioned cleaning scraper
- Lagged head pulley

Applications

Peat moss, compost, mulch and mixes of products such as reed sedge, top soil, sand, bark, manure, wood shavings, etc.

Options

- Vulcanized belt joint
- Chevron/cleated belt
- Gearmotor TorqLOC[®] mounting system
- Self-cleaning tail pulley
- Central take-up for bidirectional use or for long conveyors
- Stainless section for use with magnet
- Transition chute
- Dedusting port

Technical data

Typical equipment dimensions:

Length:.....	5' to 150' (1.5 m to 46 m)
Width:.....	24" to 42" (610 mm to 1067 mm)
Height:.....	Varies depending on system configuration
