

ZHW-100

Full-automatic Boxing Machine

Introductions:

It is suitable for packing pharmaceutical aluminum plastic and other related similar content compact with automatic fish folding ,foring.opening and loading ,batch number printing as well as seaing tec processes .it adopts PLC control,photoelectricity supervision to coordinate with every parts .once something unexpected happens when its operating .it can stop and display the reasons automatically this machine can be used separately,and also can used with other blister packing machines.

Applications:

- PLC control system;
- Current GMP compliant design
- Easy and fast size changeover
- Secuer inserting of prouct and leaflet
- Safety and controls of automatic cartooning
- Various coding ,such as emboss
- Carton rejection by mission leaflet

Main Technical Specification

Main Technical Specification	
Model:	ZHW-100
Quantity:	1 set
Mechanical speed	100
Running speed	20-100 boxes/min
Power consumption	1.5kw
Air consumption	70 nl/1'
Size range of cardboard box	From65 x 35x 12mm to 155 x 90 x 65mm
Quality of cardboard box	250 - 350gsm
Quality of operation manual	55 - 65gsm
Electric source	380V, three-phase A.C., 50Hz, power: 1.5kW
Compressed air	0.6MPa
Air compressor	more than 0.22m ³ /min (self-prepared)
dimensions	2800*1400*1650mm
Weight	1200kgs
