

## *Ultrasonic Tube Sealer SBM-US125*

Ultrasonic Tube Sealing machine adopts movable line, using ultrasonic principle the tail sealing the hose, composite pipe, good stability, high efficiency, dynamic components are well-known brands. This machine chassis improvements on the basis of the original Sealing Machine made of 304 stainless steel and increase the sealing and cutting function, so this section of the machine to meet the harsh working environment as well as to meet the corrosive product Sealing a shape (Sealing at the same time automatically superfluous edges cut off) function. This machine is suitable for toothpaste, cosmetics, medicines, food, industrial supplies, such as various types of hoses and sealing.

### **Features**

- Two dimensional adjustment of work piece platform, it is easy to operate.
- It adopts Taiwan cassette mechanism and circuit Lines, using famous brand of Ultrasonic parts.
- Overload protection, phase separation protection, power-fail protection.
- Large Ultrasonic Out put power to ensure the sealing quality of various specifications of tube.
- It can sealing soft tube also can printing date and cutting.

## Technical Info

<b>Model</b>	<b>SBM-US125</b>
Speed	15-20 pcs/minute
Material	stainless steel
Automatic grade	semi-automatic
Motor power	1200w
Power supply	AC220V/50Hz AC380V/50HZ Optional
Sealing diameter	5-80 mm
Machine dimension(L×W×H)	110mm×460mm×450mm,1100mm×570mm×750mm
Machine Weight	64kg(without basic support),84kg(with basic support)
