

JZGY-B series Automatic Liquid Filling Machine Line

The machine adopts the principles of design time control flow, filling volume, especially suitable for filling liquid products better mobility, the majority of wine, cosmetic, detergent, pharmaceutical and food industries ideal for low viscosity products filling machinery

Technical parameters:

- Suitable container: Cylindrical bottles, flat bottles, square bottles and shaped bottles
- Filling capacity: 30-5000ml
- Filling head: 4-10 heads
- Filling speed: 1000-6000 p/h (depending filling volume and filling head depending on the number)
- Filling accuracy: + -1% Time Control Flow
- Vacuum backflow control surface + -1mm
