

## *Automatic Sticker Labeling Machine ES-DS*

Applies to product like square/plat bottle in medicine, food, cosmetics and other industries.

Have the positioning labeling function for round bottle and the advantage of long-term durability.

### **Functions and features:**

Use the elastic symmetric double-strand as the bottle correction mechanism; make sure the state of bottles is consistent and correct before entering the labeling mechanism.

Servo motor style double-side labeling machine.

The system of double-side labeling machine automatically detect the actual size of the object being pasted, make sure to finish labeling without bubbles by many processes, such as the priority of labeling, label support by the scraper blade, extrusion by sponge roll and so on.

Top string adjustment device make the operation of changing different size bottle more simple and convenient.

Design for plat, square, irregular surface and crooked bottle, make sure the labeling accuracy and effect.

### **Technical parameters:**

- Object being pasted: diameter20-120mm; height50-300mm
- Label size: width 20-250mm
- Labeling speed: 50-100 bottle/minute
- Labeling accuracy:  $\pm 1$ mm
- Power supply: 220V50/60HZ 0.75KW
- Machine size: 3000\*1620\*1900mm
