

WENZHOU FEIHUANG MACHINERY EQUIPMENT CO., LTD

LX-6000A Continuous Induction Sealing Machine

Automatic sealing machine electromagnetic induction aluminum foil sealing machine in the series is a high-end products, the product switching power supply power can be adjusted manually configure digital display thermometer, advanced AC variable speed motor performance, reliable, stable delivery. Automatic sealing machine with CVT closed loop system with intelligent sensor switch, can intelligent transportation products, automatic detection and diagnosis, all air-cooling, all seasons.

Technical Parameters:

Model	LX-6000A
Voltage:	110V 60HZ or 220V 50Hz you can choose
Power:	2.4KW
Production Capacity:	250P/S(ϕ 40mm Flat Cap PE bottle)
Sealing Diameter:	20-80mm
Suitable Height of bottles:	20 - 300 mm
Bottle of diameter:	20-80mm
Sealing type:	Continuous type
Transporting Velocity:	0 - 10m/min
Machine size:	1120 x 470 x 590 mm
Machine Weight:	40 KG
