

Automatic Bag Filling Machine XY-BZD1000

The machine is mainly suitable for the quantitative packaging of granular, granular powder, strip, block and other materials. Particle materials such as pesticide, fertilizer, feed, Chinese herbal medicine, traditional Chinese medicine granules, premix, washing powder, leisure food, candy, melon seeds, peanuts, salt, MSG, chicken, seeds, food, hardware etc. quantitative filling and packaging.

Character for the accessory equipment grain filling machine:

- English PLC touch screen
- High precision electronic weighing scale, high precision
- Full stainless steel structure, easy to clean and corrosion resistant.
- Artificial bagging, photoelectric sensor
- Vibrator feeding, fast speed, high accuracy

Function for the accessory equipment grain filling machine:

- Electronic scales automatically set to zero, overweight alarm
- Weighing errors can be automatically corrected, the amplitude of the vibrator with adjustable voltage.
- Packing data can be stored in 99 different parameters, easily to find what you want.

Technical Parameters:

Model	XY-BZD1000
Voltage	220V 50Hz or customized
Power	500W
Filling range	5-6000g(adjustable)
Speed	20-30 pack/min
Accuracy	± 0.3%(also depends on prudct)
Machine dimension (L W H)	710*840*1800mm
N.W./G.W.	100KG/ 120KG
