

ZL High Shear Mixer Granulator

It can be used for homogenization of type granules and granule modification of the block masses and bigger granules during kneading or drying in the pharmaceutical, chemical and food industries.

ZL- High Shear Mixer Granulator Characteristics

1. Less heat and dust during operating.
2. With stainless steel structure, complete machine can be moved.
3. Screen is made of a stainless steel cylinder which can be cleaned easily and longevous. The size of the screen can be changed.
4. It is suitable for many kinds of granule modification due to variable frequency speed regulation.

Main Technical Variables		
Model	160	300
Diameter of Screen Mesh Cylinder	160mm	300mm
Diameter of Screen Mesh Bore	1,1.2,1.6,1.8,2mm	22/15/12/11/10 mesh
Productivity	100~1200kg/h	200~2500kg/h
Total Power	1.5kw	5.5kw
Rotate Speed	175~1400r.p.m	200~1400r.p.m
Weight	150kg	200kg
Overall Dimensions	1000×1000×1300mm	1000×1200×1500mm
