

## *Automatic Sticker Labeling Machine for Filling Machines*

Automatic sticker labeling machine can realize double-sided circumferential labeling at the same time, which can meet single-sided and double-sided labeling of flat bottles, square bottles and round bottles, and the entire circumference of the cylinder, half-circle labeling. It is widely used in the food, cosmetics and daily chemical industry. Optional tape printer and inkjet printer can be used to print the production date on the label. It is usually combined with Automatic Bottle Filler Machine and Capping Machine to form an automatic production line.

### **Feature:**

1. The dual clutch makes the strain more balanced and stability to ensure the labeling accuracy.
2. The labeling head convenient to adjust, the labeling speed is automatically synchronous with the conveyor belt speed to ensure precise labeling.
3. The speed of conveyor line, the speed of pressure belt and the speed of label output can be set and changed by the human interface.

**APPLICATION:** It applies to food, cosmetic, pharmaceutical and other light industries in a variety of plane, flat square products, side and sweeping surface labeling. It is also suitable for Bottle Filler Machine and granule, powder and VFS Liquid Sauce Packing Machine.

**Technical Parameter:**

Driver	Motor
Power Supply	220V/50Hz
Power	280W
Labeling Speed	24 meters/minute
Labeling Precision	±1mm
Max. width label	110mm (Can be custom-made)
Inner dia. of paper roll	Dia.76mm
External dia. of paper roll	220mm or Max. Dia.300mm
Size (LXWXH)	560mm*340mm*550mm
Weight	36kgs
