

Automatic Single Head Chuck Capping Machine

VKPAK's chuck capping machines use the latest technology to automatically place and accurately torque most cap types onto most bottle types. The chuck capping machines can place and torque flat caps, oval caps, flip top caps, pull spouts, safety caps, child proof caps, sport caps, and caps with over-caps or induction seals. The chuck capping machines can handle almost any bottle type or shape including PET, PP, PVC, HDPE, LDPE, and Glass.

The series full automatic bottle capping machines are the full automatic control system machines. It's specially designed for bottles/jars/cans/buckets screw cap twist off capping. It consist of cap unscrambler and loading, twist off torqueing automatically. It,s widely apply in food, chemical, pharmacy factories.

Hot sale high speed automation capping machines for twist off cap

This series capping machines are customized base on different products, bottle size, cap size and capacity required. Bottle unscrambler machine, filling machine, capping machine, labeling machine, ink coding machine and packaging machines can be added as an option and combine freely.

Technical Parameter

Capping Head	1 Head
Production Capacity	12-30BPM depending on bottle sizes and shapes
Bottle Height	Up to 460MM
Cap Diameter	Up to 70MM
Voltage/Power	220VAC 50/60Hz 450W
Driven way	Servo Motor
Interface	DALTA Touch Screen
Spare Parts	Capping Head
