

Vertical Form Fill Seal Machines TWN-Z/TWN-ZH

Vertical Form Fill Seal machine(VFFS) forms bag from film and fills an assortment of products such as powders, granules, and pieces, which come in a variety of shapes and kinds of foods such as candies, coffee beans, frozen foods and snacks by dropping vertically.

These vertical form fill seal machines have a built in zipper device.

The zipper device control box is integrated with VFFS machine that improves its maintenance ability.
