

DGD-280AJ Automatic Powder Auger Filling Machine

DGD-280AJ automatic horizontal bag feeding bagging machine is an online weighing bagging machine newly developed by our company. Under the programmable control of PLC, the functions of bag taking → bag opening → detection → filling 1 → filling 2 (weighing) → sealing → finished product are realized.

The machine is designed according to the requirements of the new GMP. It adopts an arc-shaped frame and is equipped with a complete dust removal system. It meets the production requirements of the veterinary drug industry and is suitable for the packaging and production of various prefabricated bag products.

Technical Parameters:

Productive Power.	20-40bags / min
Applicable Bag Size	W120-280mm L180-380mm
Packaging Capacity	≤1000g
Filling Precision	±1g(100g) ; ≤±2g(200-300g) ; ≤±3g(300-500g) ; ≤±3g(500-1000g)
Air Pressure	0.5-0.7MPA 500L/min
Power	AC380V 50Hz/6.0KW
Equipment Size	3665×2420×1465mm(L×W×H)
