

DPP-180 Automatic Blister Packing Machine

DPP-180 high speed al/plastic blister packaging machine, the machine is an advantage at home and abroad for innovative plastic packaging machine design, machine key parts of the company a number of innovative technologies. Packing for the pharmaceutical industry, tablets, drugs, capsules, also packaged foods and small metal parts, electronic components. The machine set coil unwinding, aluminum feeding, blister forming, filling materials, waste recycling, plastic heat sealing, printing batch numbers, textured indentation, forum cutter display counting ten functions in one machine, packaging materials good seal, safety and health.

Technical Parameter:

Item		Parameter
Cutting Speed		25-50 times/min(AL-PVC)
Capacity		6000-14000 sheets /hour
Stroke Range		30-120 mm
Max. Forming Area		160×110mm
Max. Forming Depth		25mm
Power Supply and Total Power		380V 50Hz 8.5KW
Main Motor Power		3.8KW
Cooling system		Condensate or water cooler
Packing Material	Medicinal PVC	(0.25-0.5)×1800mm
	PTP Alu-foil	(0.02-0.035)×180mm
Machine Dimension (L×W×H)		3050×590×1550mm
Machine Weight		750Kg
