

Two Sides Bottle Labeling Machines Automatic

Automatic double side adhesive labeling machine is suitable for applying sticker labels on the front and back side of bottles, jars, etc; which are round, flat, oval, rectangular, or square in shape. The labeling speed is also dependent on the stable motion of the product on the conveyor of the equipment, at a relatively higher speed.

Features

1. Applicable to the pharmaceutical, food, cosmetic and other industries, the circumference of the round object and high precision are (double standard) and the fixed point and position on the back label; Can also meet with taper product labeling requirements.
2. The advanced affinity man-machine interface system, easy operation, complete function, has the rich online help function.
3. Unique bottle at three-point position, avoid to linear labeling machine labeling bottle is irregular, and the bottle is not caused by the error of vertical labeling skew, then it let labeling more accurate, beautiful, caresses.
4. Automatic photoelectric detection, it has the function that nothing come from conveyor and no stick label and without label automatic correction or alarm automatic detection function, prevent leakage and waste.
5. The machine structure is simple, compact, easy to operation and maintenance.

Technical Parameters

Voltage	AC110/220V 50/60HZ
Labeling Speed	20-60bottles/min
Labeling Accuracy	±1mm (depend on the evenness of the plane)
Printer to use air	5kg/cm ²
Roll Size	Φ75 mm Φ200 mm
Suitable label size	15-180mm (W)15-300mm (L)
Dimension	2000 mm(L)×1000mm(W)×1360mm(H)
