

DLL-158 High Speed Alu-Alu Packing Machine

This machine is a medicine baling press assimilated and improved on the equipment of importing foreign advanced equipment and technology by scientific and technological personnel. Have the characteristics of Novel design, rational structure, flexible regulation, convenient maintenance and operation.

This machine equip rotary type and vibration try, liberation full charging mechanism, conversion governing and free-installing strike; automatically finish various processes of filling up, heat seal, tearing thread, stamping lot number and cutting into parts; can reach high speed synchronous operation exactly and accord with the demands of 'GMP'.

Suitable for the sunless package of varied tablets, capsules and special-shaped solid articles in medical industry, taking shelter from light and dump proof.

Technical Parameters

SpeModelc.	DLL-158
Production efficiency	10000-30000 Pills/Hour
Motor power	0.55kw
Air Compressed	0.4Mpa
Power supply	220V/50HZ
Packing width	Max width 160mm
Overall dimensions	L×W×H 1260×850×1520mm (Vibration type)
	L×W×H 1280×850×1350mm (Rotary type)
Weight	420kg
