

## ZL-250-G Rotary Granulator

The machine widely used in pharmaceutical foodstuff and chemical industries, drink. Take the materials after stirring make out the grains, especially to the upper viscosity materials. The machine high moulding rate, grain good, automatism output, abstain materials disrepair of man work, fit for pipelining.

The machine structure simple, figure beautiful, some main parts contact materials are all made of stainless steel .

### Technical Parameters

Model	ZL-150-A	ZL-250-G	ZL-350-G
Power(kw)	1.5	3	4
Size of grinding blade(mm)	150	250	305
Production capacity(kg/h)	30	300-400	400-600
Diameter of granule(mm)	1.2-3	1.2-3	1.2-3
Roll speed (rpm)	60	50	36
Overall dimensions (mm)	700*400*700	1200*700*1100	1350*800*1200
Weight (kg)	60	400	600
