

## *Automatic Lipstick Filling Machine Liquid Eyeliner Filler ACZ*

Automatic Lipstick Filling Machine has the advantages of easy to clean, high efficiency and application widely. It is suitable for filling a lipstick, lip balm, foundation cream, pearl cream, eye shadow and other liquid or paste materials.

### **Features:**

- 1) The machine is designed pointed to liquid cosmetics, i.e. Lipstick, pencil lipstick, brow pencil, lip oil, lip balm...
- 2) Individual object barrel stirring and temperature control design, meet the requirements of varieties of raw materials.
- 3) It adopts advanced atomization technics (human machine interface, PLC program control), parameters including time and temperature control from the whole machine needing to set all is completed by human machine interface. Simplify operating system program and make the machine function stabler.
- 4) The machine adopts aluminum extrusion construction, easy to clean on the aluminum station.
- 5) System operation program is simple, it does not take time to educate and train.
- 6) Every unit (including object barrel, pump, object tube, nozzle)all adopts intelligent temperature control individually, temperature control precision is  $\pm 0.3^{\circ}\text{C}$ , make the equipment easier operate
- 7) Auto-counter.

**Machine Parameters:**

<b>Item</b>	<b>Description</b>
Hoper volume	20L, Double Layers and oil removal heating
Max filling volume	20ml
Filling precision	±0.1ML
operator	One person
Filling capacity	1~14ml/piece
Filling speed	30~60 pcs/min.(the quantity of stuffing material affect the speed)
Hopper volume	20L for each hopper; (Hopper can do customzied) Double Jacketed
Temperature	0-180°C, working temperature:80-120°C
