

Manual Sealing machine for Pre Cut Aluminum lids PLB-4S

Performance: Manual sealing machine for Pre Cut Aluminum lids

Output: up to 14 cups a min

Product: Powder / Granulated / Pieces / Paste / Liquid

The PLB-4S machine is ideal for packaging a wide range of products in plastic cups sealed with aluminum foil lids.

The Machine Includes:

- Moving platform
- Heating press
- Timer & Thermostat

Features:

- Fast and simple: can be easily handled by one operator.
- Fast and reliable sealing system that assures a high quality result.
- Easy maintenance of the machine.
- Various dimensions of socket and platforms are available.
- All product contact parts are stainless steel. The machines are manufactured using stainless steel, anodized aluminum and plastic, all of which conform to CE, FDA, 3A standards for food grade materials
- Economically priced with high quality finished product.

Method of Operations:

- Insert the cup into the socket of the movable platform and adjust the sealing timer
- Place the aluminum lid on the top of the cup
- Move the platform with cup and lid to the position under the heating press
- According to the sealing time, the heating press starts to seal the lid onto the cup by pulling the handle
