BEIBOO北己 ®

RS - K80 automatic packing machine

Functions: automatic measuring, bag making, filling, sealing, printing, batch number, cut off, and counting etc. All the work; Auto complete for packing powder and particles and fluid.

Technical features: with centralized control CPU machine state of each function, man-machine dialogue interface. Intelligent temperature controller dual control of transverse and longitudinal sealing temperature. Intelligent photoelectric orientation, bright and dark move any conversion, strong anti-interference, three bags of the cursor by abnormal outage alarm. Within the scope of rated packing speed stepless adjustment. Locate mouth downtime. Spiral high measuring accuracy. System with standard sealing beautiful. Convenient operation and maintenance. Measurement by volumetric method for density uniform by packaging materials, accurate measurement in line with the national standards of measurement. Computer control, step motor to pull bags, rotating knife cut the bag. The sealing form for three edge sealing.

Main use: RS - K80 automatic packing machine is mainly used for the following products or similar products: grain kind medicine, sugar, monosodium glutamate, salt, coffee, tang, tea, seeds such as fine particulate matter.

Technical parameters:

Metering method	volume method
Measuring range	5-60ml
Packaging speed	50-90 Bags/min
Bag-making size	long：50-120mm wide：50-85mm
Mains input	220/380V 50HZ
Total power	870W
Weight	170kg
Boundary dimension	LxWxH：800x650x1500mm
