

Ice Lolly Tube Auto Filling and Sealing Machine GF1701

The machine is suitable for filling and sealing the smaller mouth plastic bottle of polyethylene. It's specially for filling liquids or little viscosity materials, such as, juice, jelly drinks, ice pop and so on. It's full automatic process, from hanging bottle, blowing bottle, filling, heating, sealing to out feed. Also with special unit, no bottle no filling, PLC control. Fast speed, one hour can reach 10000 pcs ! It's the best equipments for mass production! This machine is made of Stainless Steel, meeting up the food healthy standards.

Technical data:

Packaging Speed:	6000-10000 piece/h
Filling Content:	15-200 ml
Power:	380V50HZ
Electric Machinery Power:	1.5 kw
Heat Up Power:	6kw
Outline Dimension:	4000x1000x2000(LXWXH)
Timing Mode:	Frequency inverter
Gross Weight:	Aprox1500 kg
