

## Forming-Filling-Sealing Machine (DFJ-130)

DFJ-130 Paste liquid forming-filling -sealing machine is widely used for many materials. The length can be adjusted, and several different specification machines can be equipped in terms of packing specification and weight of the bag.

DFJ-130 Paste liquid forming-filling -sealing machine is the ideal choice for packing foodstuff, pharmaceutical, cosmetic, and chemical industry, such as sweetened bean paste, lotus paste, fruit jam, peanut butter, Chili sauce, salad sauce, cheese, peanut oil, soy sauce, wine, mineral water, liquid , Non-food detergent and grease.

### Features:

1. Control part adopts Japan Mitsubishi PLC Program logic system, which has stable performance and self-checking function.
2. DFJ-130 Paste liquid forming-filling-sealing machine is controlled by PLC with human-machine interface display, which is easy to operate and maintain.

### Technical Parameter:

Model Name	DFJ-130
Capacity	(bags/min)10-15
Volume(ml)	0-250ml
Bag size(mm)	Length: 50-200 Width: 65
Sealing style	3 side sealing
Hopper (liter)	8.6
Power(kw/v)	0.9-220
Dimension(mm)	500x400x650
Weight	39kgs
