

## Glass Bottle Beverage Filling Machine GCFS-series

This is the advanced filling & capping machine developed based on introducing, digesting and absorbing foreign leading technology. It is widely used to rinsing, filing and capping the glass bottles of drinks with gas such as cola, light sparkling wine, etc. It has the advanced structure, stable and reliable working performance; stepless speed regulation and high production efficiency which makes it become the ideal filling machine for the small and medium-sized beverage factory.

Model	GCFS18-18-6	GCFS 24-24-8	GCFS 32-32-8
<b>Production Capacity (500ml) b/h</b>	2000-4000BPH	4000-6000BPH	6000-8000BPH
<b>Glass Bottle Diameter (mm)</b>	Ø50- Ø 90	Ø50- Ø 90	Ø50- Ø 90
<b>Glass Bottle Height (mm)</b>	150-320	150-320	150-320
<b>Filling Temperature (°C)</b>	0-5°C	0-5°C	0-5°C
<b>Filling Style</b>	Isobar Filling	Isobar Filling	Isobar Filling
<b>Suitable Cap</b>	Crown Cover	Crown Cover	Crown Cover
