

Carbonated Beverage Washing-Filling-Capping Machine FG-series

Product Description

1. This kind of carbonated beverage filling machine combines washing, filling and rotary capping functions in one unit. It is fully automatic and high efficiency liquid packing equipment.
2. Carbonated beverage filling machine is suitable for packing beverage containing gas. carbonated beverage filling machine 's performance is as following all parts, for instance, filling valve, which directly contact medium are made of stainless steel or harmless material. So it conforms to the requirements of Food sanitation. Sealing parts are made of heat-proofing rubber, in order to meet the technique requirements of users to sterilization at high temperature.
3. Carbonated beverage filling machine Using programmable controller to realize fully automatic control from bottles entering to finishing packing, carbonated beverage filling machine Using transducer as speed regulator, so the user can regulate the machine easily to suit different power requirements, Adopting equal pressure filling principle and current spring valves in order to assure beverage quality, Using advanced magnetic coupler to regulate cap-screwing torque, in order to assure capping quality.

Model	FG16-12-6	FG18-18-6	FG24-24-8	FG32-32-10	FG40-40-12	FG50-50-15
washing no	16	18	24	32	40	50
filling no	12	18	24	32	40	50
capping no	6	6	8	10	12	15
capacity(500ml)(BPH)	3000	5000	8000	12000	15000	18000
install capacity(kw)	3.5	4	4.8	7.6	8.3	9.6
overall size(cm)	245*180*240	265*190*240	290*210*240	410*240*240	455*265*240	545*321*240
