

Fully-Automatic Cup Forming Filling Sealing Machine DX-6000/12000/20000

The DX series machines are applicable to the packaging production of yogurt, milk, beverage, butter, cheese, seasoning, ice cream, etc. with the output variant from 6000 cups/hour to 60000 cups/hour. Compatible to plastic sheet made of PS, PP, PET etc, the whole process from sheet ionization dedust, preheating, plastic cup forming & labeling, online dynamic fruit mixing and volumetric filling, sealing, date printing, cutting and product transportation is completed full-automatically. These series machines, which have the functions of wrap around labeling, side labeling, 2-chamber cup, children cup and hot filling functions etc. are the full-automatic equipments for high-quality, high-efficiency and low power consumption production in modern enterprises.

Parameter:

Model	DX-20000	DX-12000	DX-6000
Capacity	20000 c/h	12000 c/h	6000 c/h
Total Power	55kW	45kW	20kW
Operation Power	32kW	27kW	12kW
Step Cup number	12	8	8
Driving Mode	Servo	Servo	Chain
Standard Cup	●	●	●
Wrap Around Label	●	●	○
Side Label	●	●	○
