

## *Vertical Full Automatic Packing Machine SUN-420*

### **Product Description**

1. It completes the whole procedure of filling, measuring, bagging, date printing, charging (exhausting), product out-putting automatically.
2. A complete set of equipment is economical.
3. Vertical form-fill-seal machine with 10 heads combination weather.

### **Machine Feature**

1. This machine can automatically complete following work: material lifting--auger filler measuring--coding--bag making--filling--sealing--counting--conveying finished products--sorting finished products.
2. PLC servo and pneumatic control system and super touch screen to form the drive control center; high reliability and the intellectualized degree, and equipped with safety protection.
3. Touch screen can store a variety of different product packaging process parameters, when replacement product can be used at any time without having to reset.
4. Equipped with fault display system, when the fault occurs, be clear at a glance, in order to promptly eliminate.
5. Can make hole punching device after customer's request.

**Parameters:**

<b>Packing Machine SUN-420</b>	Packing Speed	5-60 Bags/Min
	Volume	1000ML
	Bag Width	80-200MM
	Bag Length	60-300MM
<b>Packaging Film</b>	Max Width	420MM
	Thickness	0.04-0.09MM
	Material	OPP/CPP PET/PE PET-AL/PE Lamination
<b>Packing Machine SUN-420</b>	Weight	450KG
	Air Consumption	0.8Mpa 0.3m <sup>3</sup> /Min
	Power Supply	2.2Kw 220V 50Hz
	Dimension LxWxH	1320x920x1392 MM
