Label Intelligent Management Edible Oil Labeling Machine ST-2510B

Main uses: Especially for food, oil and other industries in the square, round bottle—like materials on the rapid automatic labeling requirements and design, can realize the square bottle/flat bottle (full bottle state) of the side (flat) single post/corner tender, but also to achieve circular bottle circumferential positioning single/Double posting function, the scope of application Can be used in a wide range of single use, And can be used in conjunction with the production line.

Performance characteristics:

- Optimal combination of speed, accuracy, stability, ease of use and flexibility
- To meet food, oil and other industries in the square, circular bottle—like material on the rapid automatic labeling requirements, the realization of the square bottle/flat bottle (full bottle state) of the side (flat) single post or corner labeling, but also to meet the circular cylinder circumferential positioning single/double—card labeling function requirements. Good versatility, high stability and durability
- Unique separation mechanism to ensure reliable and effective separation of materials when used online
- A unique corner—marking mechanism to ensure that the square bottle three side corner labeling flat, wrinkle—less
- Label Intelligent Management, warning prompt function, optional image detection system, etc.

Technical parameter:

Model	ST-2510B
Material size	Round Bottle: φ80-φ150mm
	Square/Flat Bottle: Length 100-180mm,width 80-180mm,Height 50-350mm
Labeling Speed	Square bottle size/Corner labeling(5L Bottle) 45Bottles/Min
	Round bottle Positioning single post(1.8L round bottle):35Bottles/Min
Labeling accuracy	Side Labeling Position error range:≤±1.5mm
Diameter of paper roll	φ76mm
Diameter of the roll	Max350mm
Machine Size	L2400*W1150*H1200mm
Weight	350kg
Use of electricity	380/220V 50HZ 1KW
