

## YGF Cans Filling Machine

This series of products is the introduction of filling technology, through digestion and absorption, development of equipment design and manufacture of the cans filling and sealing. The YGF series machines are suitable for carbonated drinks at room temperature, filling and sealing.

Our company according to the actual situation of domestic large and medium sized canned food factory, beverage factory, according to the foreign advanced filling and sealing of similar products and the design and manufacture of a new generation of filling and sealing machine. The tank body contact pneumatic control automatic cover, using liquid filling technology, production capacity of more than 95% frequency conversion, the appearance materials are stainless steel, to ensure the appearance and hygiene requirements. In order to improve the degree of vacuum in the tank, customers can request the configuration of the steam injection device.

### Technical parameters:

- Canned letter number: 4
- Filling head number: 18
- Production capacity: 80 to 300 cans per minute
- Apply tank height: 70 ~ 133mm
- Suitable for diameter: diameter of 52.5 ~ 99mm in diameter
- Motor power: 5.5kw
- Dimensions: 3080 x 1720 x 2000mm
- Weight: 4000kg
