

Liquid Bottle Filling Machine Honey/Coconut/Oil/Paste MTFM-1100

Application

- Widely used in chemical, daily chemical, petro chemical, medicine, pesticide, food, beverage industries etc.
- To fill liquid products, such as tomato sauce, milk, edible oil, chemical liquid, pesticide liquid, drink etc.
- Automatic type, can work with other machine, such as capping machine, labeling machine etc.

Spec and Feature

- It is the economical filling machine. Save time, material cost and labor cost.
- Simple structure; easy to move and operate, use and maintain.
- The filling quantity is adjustable and more accurate.
- It uses PLC programmable control. Complete pneumatic machine, much safer.
- Also adopts piston controlling filling material flow to meet the request of kinds of measurement filling.
- Structure compact, used for different bottles and changeable bottle.
- It adopts Frequency controlled drive, and transportation exit is adjustable, so it could meet different packaging machinery pipeline request.

Work flow:

- Manually load bottles on conveyor or turntable (optional)
- Automatic filling with 2 filling nozzles (customizable)
- Filling automatically
- Push out bottle on conveyor after filling and capping

Parameter:

Speed	800-1500bph (customizable)
Filling accuracy	$\geq 99\%$
Filling volume	100-1000ml, 200-2000ml, ... 500-5000ml(customizable)
Filling method	piston + air cylinder
Power supply	220V 50hz 2kw
Bottles applicable	a wide shape range
Application	Liquid or viscosity products
Feature	PLC, touch screen
