

## ***Rotary Extrusion Wet Food Powder Granulator Machine XZL-250***

XZL series type rotary Granulator Machine is mainly used in pharmaceutical, food, medicine, chemical, solid drinking and other industries. This machine can granule the mixed and stirred material, especially suitable for the material with high viscosity. This machine is made of high quality stainless steel, not only contact material parts, but also other parts. The Granulation Machine is beautiful in appearance, reasonable in structure and simple in operation.

### **Technical Parameters:**

- Model No.: XZL-250
- Capacity(kg/h): 100-200
- Granule diameter(mm): 0.5-3
- Power(kw): 3
- Overall Size(L\*W\*H)(mm): 1200\*700\*130
- Weight(kg): 350
