

HW-1350 Fully Computer Controlled PET Electronic Tray Automatic Vacuum Thermoforming Machine

Features:

- Using microcomputer touch screen man-machine interface control system, the operation is intuitive and easy to operate, convenient and easy maintenance
- Frequency conversion motor control feeding, fast, accurate and steady
- Heating furnace temperature control module, display the temperature degree directly, accurately detect the temperature of each piece of heating
- Automatic alarm function, truly electromechanical integration
- Vibration demould.
- Electric furnace adopt stainless steel, heat preservation cotton sealing structure, effectively prevent heat loss.
- PET, PS anti-static electronic revolving tray, PVC cosmetics, daily necessities packaging, PP, PET food tray and other external plastic packaging products.

Technical Parameters:

Model	HW-1350
Forming Area	710-1350(mm)
Suitable sheet's thickness	0.15-2.0(mm)
Forming Depth	150(mm)
Production Speed	220-520次/H
Total Power	48kw
Weight	3.2T
