

## Food Stretch Film Vacuum Packaging Machine SS-320V

It is a packaging machine that lays out the material, vacuum seals the film in the upper film area, and cuts it into a single product by cross-cutting and longitudinal cutting; because the stretch film packaging machine does not need to customize the bag in advance, but is covered by the bottom film and the upper film. Some users become laminating machine or four-side sealing packaging machine; the working principle of stretch film packaging machine is simple, no custom packaging bag is required, and there is no requirement for product packaging size.

### Specification:

Automatic Continuous Stretch Film Vacuum Packaging Machine			
Parameters/Model	SS-320	SS-420	SS-520
Up film width	293-294mm	395mm	492-496mm
Down film width	322mm	425mm	520-525mm
Packing Speed	5-8 cycles	5-8 cycles	4-7 cycles
Vacuum degree	≤200Pa	≤200Pa	≤200Pa
Machine Dimension	4800×850×1760mm	6500×900×1700mm	7000×1050×1860mm
Machine Weight	1100kg	1800	2400kg
Power	3P, AC380V, 50Hz, 12KW	3P, AC380V, 50Hz, 12KW	3P, AC380V, 50Hz, 20KW
Compressed Air	0.6-0.8Mpa	0.6-0.8Mpa	0.6-0.8Mpa
Pressure Cooling water	≥0.15Mpa	≥0.15Mpa	≥0.15Mpa
