

## *GSZ Filling-Capping (Cap Screwing) Machine*

Suitable for filling, stoppering, capping and sealing for glasses and plastic bottles from 30ml to 500ml.

It adopts the linear-type filling principle and applies the mechanical stoppering method to complete capping (cap screwing) process.

The machine is easy to operate and small in size whilst convenient to undergo maintenance. This machine can be connected with other machines into one compact producing line.

### **Technical Parameters**

<b>Production capacity(pcs/min)</b>	40-60
<b>Filling accuracy(%)</b>	± 2.5
<b>Number of stoppers</b>	Single head
<b>Rate of stoppering(%)</b>	≥ 98.0
<b>Rate of cap covering</b>	≥ 98.0
<b>Qualified rate of capping</b>	≥ 98.0
<b>Power supply</b>	380V 50Hz
<b>Power(kw)</b>	1.5
<b>Weight(kg)</b>	650
<b>Overall dimensions(L × W × H)(mm)</b>	2,400 × 860 × 1,450
