

BS-1000B Automatic Sleeve Type Shrink Packing Machine

The machine is applicable to packing large injection, beers, drinking, and milk products, mineral water with one-row and multi-row heat shrinkage films. It is designed with German advanced technology based on the European technology. And the electric components are all adopted the famous brands at home and abroad, which ensures the reliability of machine in running.

Characteristics:

1. The special two-wide-side sealing system ensures quick, firm sealing.
2. The import non-metal conveyer mesh belt can rectify completely.
3. The attached transformer for AC motor controls in steeples governing
4. The electronic thermos controller ensures the accurate, steady temperature.

Technical Parameters:

Model	BS-1000B
Level Height of Feeding	850±50mm
Wording Pressure	0.6MPa
Width of Packing Film	max.650mm
Power Supply	200V/50Hz
Power of Machine	18.5kw
Actual Consumption of Work Power	12kw
MaxPacking Dimensions	420×305×350mm
Capacity	10-20bags/min
Overall Dimensions	3400×1400×2100mm(送瓶机构不算)
Total Weight	1000kg
