

## *ZX-F-02E Weighing Packing Machine*

### **Use**

- Powdery, granular materials.
- Bottles and jars.

### **Performance characteristics**

- Spiral feeding, electronic scales are directly metered.
- Microcomputer control, more reliable use.
- All stainless steel structure.
- Manually put the bottle, photoelectric induction, automatic metering.

**Technical Parameters:**

|                       |                         |
|-----------------------|-------------------------|
| Packing specification | 1g-5000g                |
| Packing accuracy      | $\leq\pm 3\%$           |
| Packing speed         | 800-1500 bottles / hour |
| Size                  | 710 * 810 * 1900mm      |
