

## Capsule Polishing Machine

The machine is novel professional equipment for pharmacy. Under the drive of continuously variable motor, it can polish and clean the dust attached to the capsule and tablet to improve the surface of medicine polishing.

### Features

The Whole machine is made from stainless steel; fast connection of roller brush leads to disassemble easily and clean thoroughly; frequency inverter controls the speed of the motor, so it can bear big start up force and run very stable and reliable. It is not only applied to polishing capsule, tablet and eliminating the static electricity, but also applied to rejecting empty capsule, little dosage capsule, separated capsules and fragment. This machine is suitable for all sizes of capsules.

### Technical Parameter

Capacity	150 000 pcs/hr
Power supply	220V,50Hz,2A,Single-phase
GW	60kg
Net weight	40Kg
Negative	2.7m <sup>3</sup> /mn -0.014mpa
Compressed air	0.25m <sup>3</sup> /mn 0.3mpa
Shape(LxWxH)	800x550x1000(mm)
Package Size(LxWxH)	870x600x720(mm)
