

## *DHC-250P Injection Blister Packing Cartoning Packaging Line (Horizontal loading)*

### **Feature:**

- The production line for injection/Ampule/vials/syringe (horizontal loading) Blister packing and cartoning.
- The components of the entire line adopts of advanced human-machine interface, independent of PLC control and alarm system to ensure normal operation and operation simple.
- Servo mechanical feeding device to ensure the accuracy of feed.
- Aspects of the operation of advanced detection methods, safe and reliable online detection system, so that product quality is 100% guaranteed.

### **Technical parameters**

Max Output :	≤100 cartons/min
Max Forming area and depth:	245×130×30mm
Leaflet size :	(100-200) × (100-150) mm
Carton material:	250-350g/m <sup>2</sup>
Carton Size:	(65-200) × (25-85) × (15-60) mm
Leaflet material:	50-70g/m <sup>2</sup>
Air compressor	0.6-0.8/Mpa≥0.8m <sup>3</sup> /min
Power	380V 50HZ 8Kw(220V, 60Hz)
Weight	4000kg
