

## *CGT500/1000 Sugar Coating Machine*

The sugar coating machine is a new invention from SINOFUDE. It coats candy with sugar or grain, making the candy more attractive and delicious.

### **Description**

The sugar coating machine is a newly designed and manufactured piece of machinery by SINOFUDE. It coats the sugar on the starchless formed or mogul line-formed jelly/gummy candy, marshmallow, or other products that need to be coated by sugar or other grains.

### **Feature and Application:**

The sugar coating machine has several features that make it an excellent choice for candy manufacturers. These features include:

Versatility – The sugar coating machine can be used to coat candies of various shapes and sizes

Fast – The machine is designed to work quickly and efficiently; thus, it can coat large batches of candy quickly

Easy To Use – The machine is easy to use; therefore, there is no need for extensive training or experience before using it.

Low Maintenance Requirements – The machine requires little maintenance throughout its lifetime; this makes it more cost-effective than other types of machines.

## Technical Parameters

Model	Capacity	Power	Dimension	Weight
CGT500	Upto 500kg/h	2.5kW	3800x650x1600mm	500kg
CGT1000	Upto 1000kg/h	4.5kW	3800x850x1750mm	700kg
