

CB-300SZ Syringe Packing Machine

Description

- 3 independent motors (Conveyor, center sealing and end sealing)
- Motion controller for quick response to various commands
- Accurate positioning
- Digital temperature control
- Food grade SS304 contact parts
- Touch screen 7"

Outstanding Features

- Using vibration tray to point material automatically, it can reduce production cost and improve efficiency
- Segregating material, feeding, printing, venting and packaging in one time, and the automatic degree is high
- The key parts of machine is adopt of stainless structure, in accordance with food QS and medicine GMP healthy requirements
- Using a new generation of servo control technology, with simple operation and it can store historical records for next time using, reduce the time of replacing products
- High speed automatic packaging, prevent the occurrence of empty bags and save package film

Specification

Model	CB-300SZ
Film width	≤300mm
Film thickness	30-80um
Dimension of film bobbin	Outer diameter≤300mm Inner diameter≥75mm
Single knife bag size	L(60-6000)xW(50-140)xH(3-50)mm
Single knife packing speed	20-200 bags/min
Power	220V/380V,50HZ/60HZ,4.65KW
Outer dimension	Accroding to the real product length
Machine weight	1000KG
Motor configuration	Full servo
Film bobbin position	Upper
Blade cut type	Rotary
Vibration tray	Size customize
