

GT2T-1000 Auto Lubricating Edible Oil Filler

The filling machine is a microcomputer (PLC) programmable control, photoelectric sensor, pneumatic execution in one of the high-tech filling equipment. This filling machine is specially used for filling food, such as liquor, soy sauce, vinegar, condiment, vegetable oil, syrup, mineral water and other pesticide liquid. Filling measurement accuracy, no drip. Can be applied to 50-1000ml various bottle types (including shaped bottles) filling.

Technical data:

Model	GT2T-2G	GT4T-4G	GT6T-6G	GT8T-8G
Voltage	110V/220V, 50HZ/60HZ, 800W			
Filling range	5-100ml, 10-300ml, 50-500ml, 100-1000ml, 500-2500ml, 1000-5000ml			
Filling speed	10-40bottles/min	20-50bottles/min	30-70bottles/min	40-80bottles/min
Filling precision	$\leq \pm 1\%$			
Air pressure	0.4-0.6Mpa			
Weight	320kg	370kg	450kg	580kg
Dimension (L*W*H)	210*86*146cm	210*110*210cm	320*110*165cm	370*110*165cm
